

650 PRM

WATERPROOFING SYSTEM: BELOW-GRADE SHEET MEMBRANE

Polyguard 650 PRM

(Puncture Resistant Membrane)

The primary use for 650 PRM vertically is sheet-applied waterproofing for below-grade walls. 650 PRM does not require protection board. The primary use for 650 PRM horizontally is sheet-applied waterproofing of structural slabs. A topping slab/wear slab will be poured over the installed membrane. Horizontal uses over conditioned and/or habitable space for decks and balconies must have Polyguard's approval prior to starting work. All horizontal surfaces to be waterproofed must have positive slope and proper drainage. If deck is not sloped, contact Polyguard Products for specific details.
