

650 TRM

WATERPROOFING SYSTEM: BELOW-GRADE SHEET MEMBRANE

650 TRM

650 TRM is a non-structural barrier which when properly constructed as part of the building envelope, it blocks both termites and water. It is formulated for low temperature application down to 30°F (-1°C) on concrete and down to 40°F (5°C) on ICF. 650 TRM can also be used horizontally on tunnel roofs, plaza decks et. al., when used in combination with Polyflow® drainage. Horizontal uses over conditioned and/or habitable space for decks and balconies must have Polyguard's approval prior to starting work. All horizontal surfaces to be waterproofed must have positive slope and proper drainage. If deck is not sloped, contact Polyguard Products for specific details.
