WATERPROOFING SYSTEM: BELOW-GRADE SHEET MEMBRANE

Polyguard 650 WRM

The primary use for 650 WRM is sheet-applied below-grade wall waterproofing for winter temperatures 10° F (-12° C) and rising. It can also be used horizontally on tunnel roofs, plaza decks et. al., when used in combination with Polyflow® drainage. Horizontal uses over conditioned and/or habitable space for decks and balconies must have Polyguard's approval prior to starting work. All horizontal surfaces to be waterproofed must have positive slope and proper drainage. If deck is not sloped, contact Polyguard Products for specific details.
