

AIRLOK® SHEET 200 SERIES

NON-PERMEABLE AIR & MOISTURE BARRIER SHEET MEMBRANES

Polyguard Airlok® Sheet 200 Series

Airlok® 200 Series Air and Moisture Barriers are non-permeable sheet membranes, available in various sizes, designed for air and moisture protection in both field and flashing applications. The butyl compound properties allow for the membrane to fully adhere tenaciously to itself, surface materials; such as wood, metal, sheathing, concrete, and fasteners that are left in place, which eliminates membrane blow-off and tears before exterior wall finish installation. Once installed and covered with cladding, the membranes are permanent and will not rot or decay from mildew or mold. The Airlok® 200 membranes are 28 mils thick and are available in various pre-cut sizes to meet the demands of traditional flashings and details.
