

AIRLOK® SHEET 400 SERIES

NON-PERMEABLE AIR & MOISTURE BARRIER SHEET MEMBRANES

Polyguard Airlok® Sheet 400 Series

Airlok® 400 Series Air and Moisture Barriers are non-permeable sheet membranes, available in various sizes, designed for air and moisture protection in both field and flashing applications. The rubberized-asphalt properties allow for the membrane to fully adhere tenaciously to itself, surface materials; such as wood, metal, sheathing, concrete, and fasteners that are left in place, which eliminates membrane blow-off and tears before exterior wall finish installation. Once installed and covered with cladding, the membranes are permanent and will not rot or decay from mildew or mold. The Airlok® 400 membranes are 40 mils thick and are available in various pre-cut sizes to meet the demands of traditional flashings and details.
