

LM 95

PRODUCT OVERVIEW

Polyguard LM 95 is a part of Polyguard's Highway family of products, and is two component, asphalt modified, urethane material. Working time is 45 minutes. Used for waterproofing multiple detail applications. When used for bridge deck applications is used to repair substrate irregularities. Will adhere to primed or unprimed concrete, but unprimed application is preferred. Also used with 650 Membrane applications. Trowel or caulking gun applied.

- For bridge deck waterproofing applications to level out uneven substrate
- Works well for spot repair of substrate in advance of membrane application
- Adheres to primed and unprimed concrete
- Ease of installation: available in widths from 12" to 48"
- Improves adhesion of membrane
