

# Membrane Installation Cart

## PRODUCT OVERVIEW

Polyguard Membrane Installation Cart is a part of Polyguard's Highway family of products, and is designed to assist installation of our highway and bridge deck membranes in a quick and efficient manner. The cart is adjustable for widths from 12" – 48". The top rail holds the roll of membrane while the bottom rail applies tension while the membrane is applied. Typically a two person job with one person directing the cart over the bridge deck or joint/crack, and the other gathering the release liner.

- Efficient and simple membrane application
- Readily adjustable to accommodate membrane width
- Great for high volume projects
- Easy to break down and transport
